Okay. I hope the meeting with Jared and Dr. Bunn goes well.

A couple notes --

- Aquifer exemption package for Arroyo Grande field was released today as anticipated. Hearing scheduled for Sept 21 and that is the close of public comment period.
- On Aug 17th DOGGR released a discussion paper on their regulatory goals for the UIC program and gave notice of 3 workshops scheduled in mid-Sept for LA, Ventura, and Bakersfield; this did not come up yesterday, but it fits with their plan for informal outreach on regulatory needs and their proposal to draft regulations for informal review by Nov 2015.

Thanks,

David

Hi David --

Have her check with folks (and their managers) in an email to see if we can pull it off when we are there in Oct. I doubt it though, my recollection was that the PWSS program needed til the end of Oct.

Hi Mike,

For the AZ workgroup meeting today, Elizabeth was asking me about the timing for doing EOY program meetings and a close-out with you. She noted that last year programs did their EOYs in Sept/Oct and you did a close-out in Dec. Is that the timeframe you expect this year as well, or do you want to target the final close-out earlier when we go down for GRIC consultation (not scheduled, but tentatively early Oct)?

Thanks,

David
